About.

Turmion Kätilöt ("Midwives of Ruin", "Midwives of Bane" or "Midwives of Perdition") is an industrial metal group from Finland. So far (as by the end of 2025), they have released eleven absolutely killer studio albums. They sing mostly in Finnish, with a few exceptions.

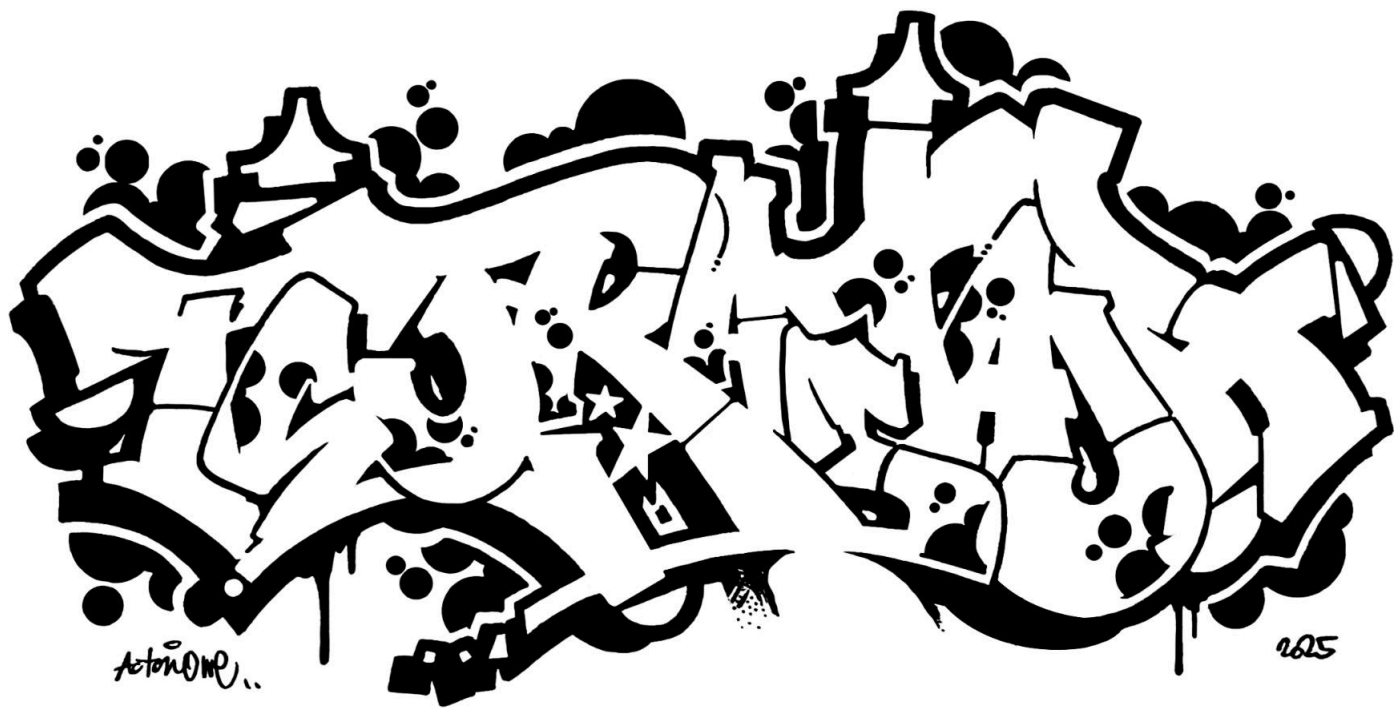

This band is *truly* something else – they perform catchy disco metal songs and like to pair the songs with wonderfully disturbed videos. Don't believe me? Well, do check out their [YouTube channel](#)!

I started listening to them in 2005–2006. Their second album, *Pirun Nyrkki*, hadn't yet been released, and I was eagerly waiting for it to hit the stores. Before that, I had only heard a few tracks from them but I was really digging what I'd heard so far. I bought those earlier releases at the same time as *Pirun Nyrkki*. I've been a fan ever since.

If you're new to the concept: these are graffiti-style sketches based on selected songs, shown in the same order they appear on each album. On the [actual webpage](#) you'll get to read more background stories and thoughts about the selected songs.
