About.

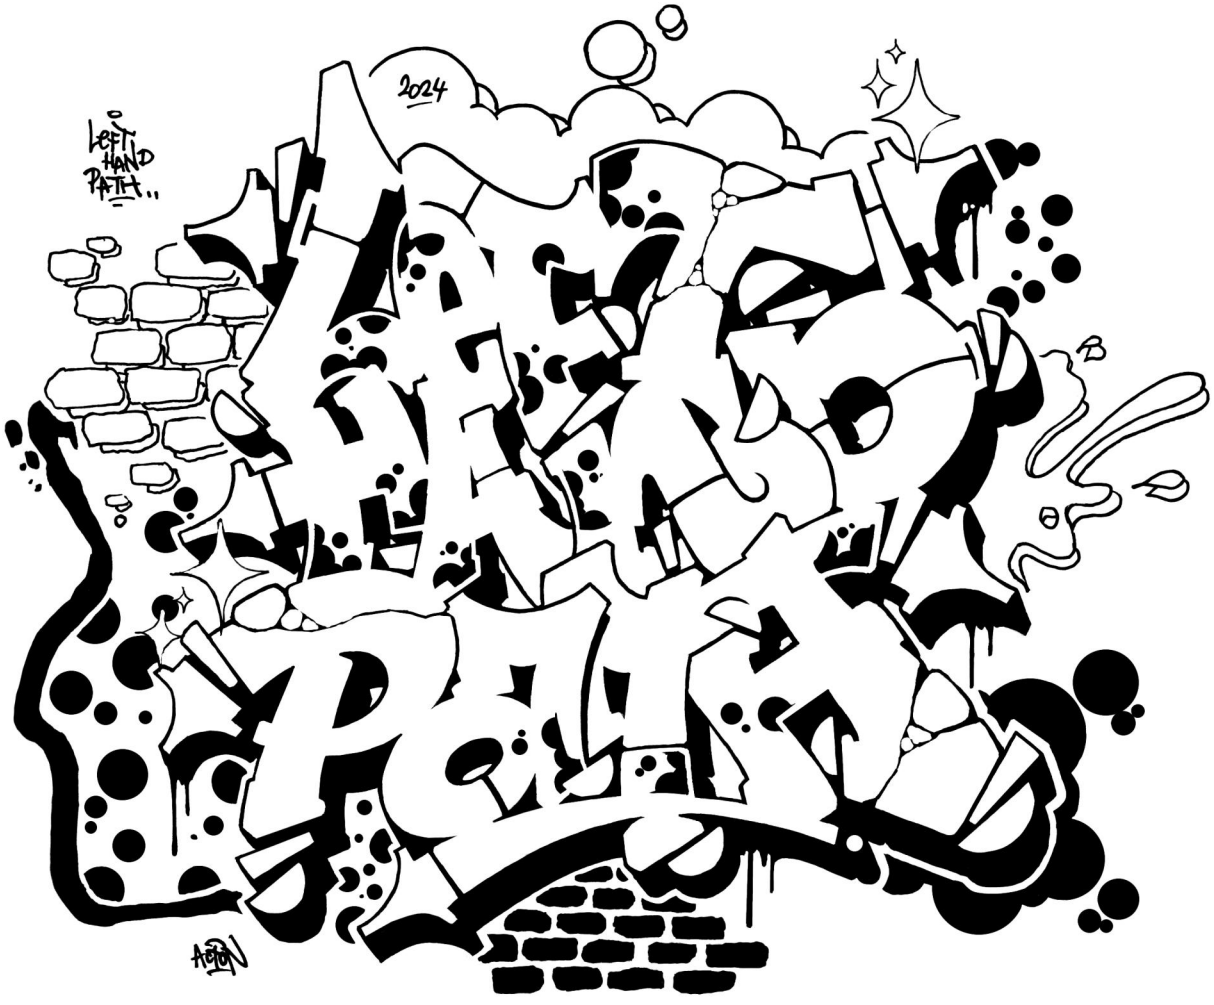

Entombed, formed in 1987, is a legendary band from Sweden. Along with **Dismember**, **Grave** and **Unleashed**, they are referred to as one of the "big four" of Swedish death metal.

Ever since I first heard Entombed's second album *Clandestine* in 1992, I was hooked. But my personal favorites from the band are the unholy trinity from 1991–1997: *Clandestine*, *Wolverine Blues*, and *To Ride, Shoot Straight and Speak the Truth*. Sure, they've released quite a few killer albums after, but these are the ones that mean the most to me. I have to admit that the opening track from their debut album, *Left Hand Path*, as well as the *Chief Rebel Angel* from *Morning Star*, also rank high among my favorites.

Even back in the '90s I was writing many quotes from their songs next to my pieces, and at least once I painted an actual "Entombed" piece together with **Dams**, a crew mate from HRC.

Entombed is also the band I've witnessed live the most so far — with the Finnish band **Velcra** coming in a *very* close second.
